Report on Traffic Awareness Day 2023

The **Traffic Awareness Day** was conducted on **December 15, 2023**, at our institution to educate students about road safety, traffic rules, and the importance of responsible behavior as road users. The event aimed to foster a culture of safety and accountability, reducing accidents and promoting public welfare.

Inauguration and Welcome Address

The program began with a warm welcome by the Principal, **Dr. Srivatsa G**, who emphasized the importance of traffic awareness in everyday life. In his address, he highlighted the alarming statistics of road accidents and the crucial role young individuals play in ensuring road safety.

Demonstration and Activities

- **Traffic Simulation:** A practical demonstration on road safety was conducted in a simulated traffic environment, where students learned to interpret signals, signs, and pedestrian rules.

- **Poster Exhibition:** Creative posters made by students highlighted the importance of wearing helmets, seatbelts, and avoiding distracted driving.
- **Quiz Competition:** A traffic safety quiz tested participants' knowledge of traffic rules and penalties, reinforcing their understanding.

Interactive Session

Students actively participated in an open dialogue with the guest speaker, addressing their concerns and discussing innovative ideas to improve traffic safety.

Pledge Ceremony

The day concluded with a **traffic safety pledge**, where students vowed to follow traffic rules and encourage others to do the same, promoting responsible road use.

Outcome

The Traffic Awareness Day succeeded in educating students about the importance of road safety and instilled a sense of responsibility as citizens. The event emphasized that collective efforts can significantly reduce road mishaps and save lives.

Personality Development and Personal Hygiene Program

Event:

Awareness Program

Speakers:

Shilpa Narayan

Training specialist and Educationalist Whisper India Private Limited

Department/Collaboration:

Women's Grievance and Redressal Committee in association with Whisper India

Remarks:

The program was conducted on 14th June 2024 by Ms Shilpa Narayan who interacted with the young women of our institute about personal hygiene and personality development. Ms. Narayan delivered an impactful lecture on Personal and Professional development. She in her lecture mentioned about prioritizing communication skills, educational goals and to develop a forward-thinking mindset in students and motivated them in improving their presentation skills. She also provided information on how to interact and overcome various professional hurdles. The session ended by providing free menstrual and personal hygiene samples to all the women. Overall, the program was an interactive, informative and helped students to bring in positive changes in their lifestyle.

OVERVIEW OF THE PROGRAM

An orientation program was organized for the first BDS 2023 – 2024 batch undergraduate students on 10th November 2023 at K.L.E. S' Institute of Dental Sciences. All the newly admitted students, parents and or the guardians of the students accounting to about 150 members attended the program

Principal of K.L.E.S' Institute of presided the program with heads of the department and staff of our institution. The students were sensitized on their roles and responsibilities and about the professionalism at our institution and were introduced to faculty of our institution. Students were also appraised on curriculum, examination pattern and other various activities during their undergraduate course. Special emphasis was given on anti – ragging measures and gender equality in our institution. Dr. Sujala Durgekar representing anti ragging committee spoke about the guidelines, rights and measures taken to prevent any ragging in the institution. Dr. Pavithra C from Women Grievance Redressal committee addressed the gathering on gender equality and the about the women rights.

Students were presented with the White Coat and batch of 2023-2024 was named as 'AGIRA'. Class representative of I BDS and few parents also spoke about their views and obliged to follow the rules and regulations of the University, Dental Council and the institution. Cadaver oath was administered to I BDS students

The program was steered by Dr.Padmanaban and his team . The program ended with a vote of thanks by Dr Kavitha.

Department of Orthodontics and Dentofacial Orthopaedics

Field Visit

The Department of Orthodontics and dentofacial orthopaedics organised a field visit to a 3D printing company named "Infinite technologies" on **13th December 2023**.

The field visit was planned to create more awareness on the 3D printers and the technologies behind 3D printing.

The program started with a brief introduction and overview about the company. This was followed by a quick factory tour that included display of 3D printed models. It was followed by presentations on the 3D printing principles and various technological aspects. Following which a demonstration of 3D printing was conducted. This session highlighted the methods of using 3D imaging and printing software. Following which a presentation on quality control measures was done. The sessions were concluded with interactive sessions among faculties, students and the company professionals.

The field visit was attended by 30 members which included the faculties and postgraduate students from the department of Orthodontics, Oral Medicine and Oral Surgery. This field visit was well appreciated by all the attendees.

REMARKS :

The ceremony commenced with the traditional presentation of white coats to the students. This act, performed by esteemed faculty members, symbolizes the students' entry into the clinical phase of their medical education. It signifies their commitment to the values and responsibilities of the medical profession.

The students collectively recited the Hippocratic Oath, pledging to uphold the highest ethical standards in their practice. This ancient oath, led by Dr. Madhu K, instills a sense of duty, integrity, and dedication to patient care, which are foundational principles in the medical field.

Following the ceremonial aspects, the students attended a series of lectures designed to equip them with essential knowledge and skills for their clinical practice. The topics covered were pivotal for their clinical practice and personal development as future doctors.

Dr. Parvati delivered an insightful lecture on sterilization and disinfection. The lecture covered the principles and techniques used to maintain a sterile environment in clinical settings, crucial for preventing infections and ensuring patient safety.

Effective communication is a cornerstone of patient care. Dr. Haripriyanka conducted an interactive session on patient communication skills, emphasizing the importance of empathy, active listening, and clear dialogue in building trust and improving patient outcomes.

The students were introduced to basic principles of clinical management by Dr. Prathima. This lecture provided an overview of patient assessment, diagnostic reasoning, treatment planning, and interdisciplinary collaboration essential for delivering comprehensive care.

In light of recent global health challenges, Dr. Madhumitha discussed personal protection measures. This lecture highlighted the use of personal protective equipment (PPE), hand hygiene, and protocols to protect both healthcare workers and patients from infectious diseases.

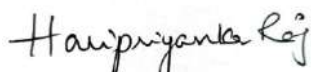

To foster a culture of inquiry and innovation, Dr. Harshitha spoke on the scope of research in medicine. Students were encouraged to engage in research activities, explore scientific questions, and contribute to advancements in medical knowledge and practice.

The students acknowledged the significance of the white coat and the oaths taken, recognizing the responsibilities and ethical obligations they now shoulder. Faculty members expressed their pride in welcoming the new class and confidence in their potential.

DEPARTMENT OF PUBLIC HEALTH DENTISTRY, KLEDC,
BENGALURU

A BRIEF REPORT ON WATER TREATMENT PLANT VISIT TO
Thoraikadanahalli (T.K Halli),
Mandya Dist.
Karnataka 571421

Department of public health dentistry had organized an WATER TREATMENT PLANT visit for final year students on 24th March 2022 to BWSSB Water Purification Plant at TK Halli. Malavalli Taluk. Mandya. It was a 550MLD unit with 5 zonal operations supplying water to Bengaluru.

The technical persons of the unit addressed the student, the plant in-charge briefed the students on plant's history and with 5 stages of purification and pumping along with conventional and latest technology as its unique and exclusive mode. It is spread across 25 acres with just 52 employees to handle the entire plant.

Enlightening the students about the importance of optimistic operational techniques by quoting that, " Out of 5 zonal operations, there is a record of 0% wastewater treatment."

During the visit, we learnt:

- To identify the level of impurities in water.
- About formation of layout of the plant.
- To identify the level of Chlorine (CL₂) in the portable water.
- About technology adoption (Pulsification and DAF) for better water treatment.
- The complete practical application of treatment techniques.

Overall, the visit was very fruitful.

The goal of water treatment is to remove existing contaminants in the water, or reduce the concentration of such contaminants so the water becomes fit for its desired end-used. The process involved in treating water is solids separation using physical process and chemical process.

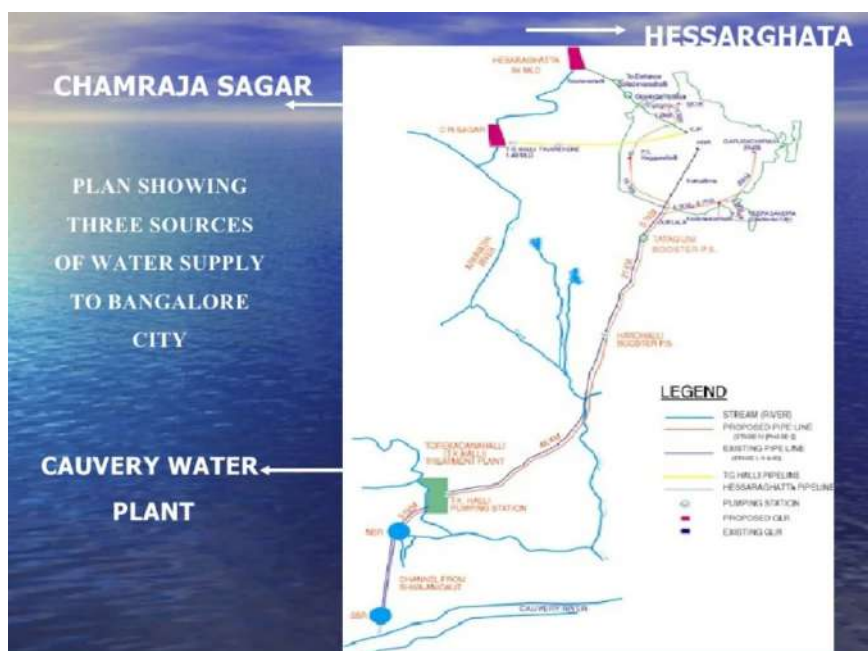

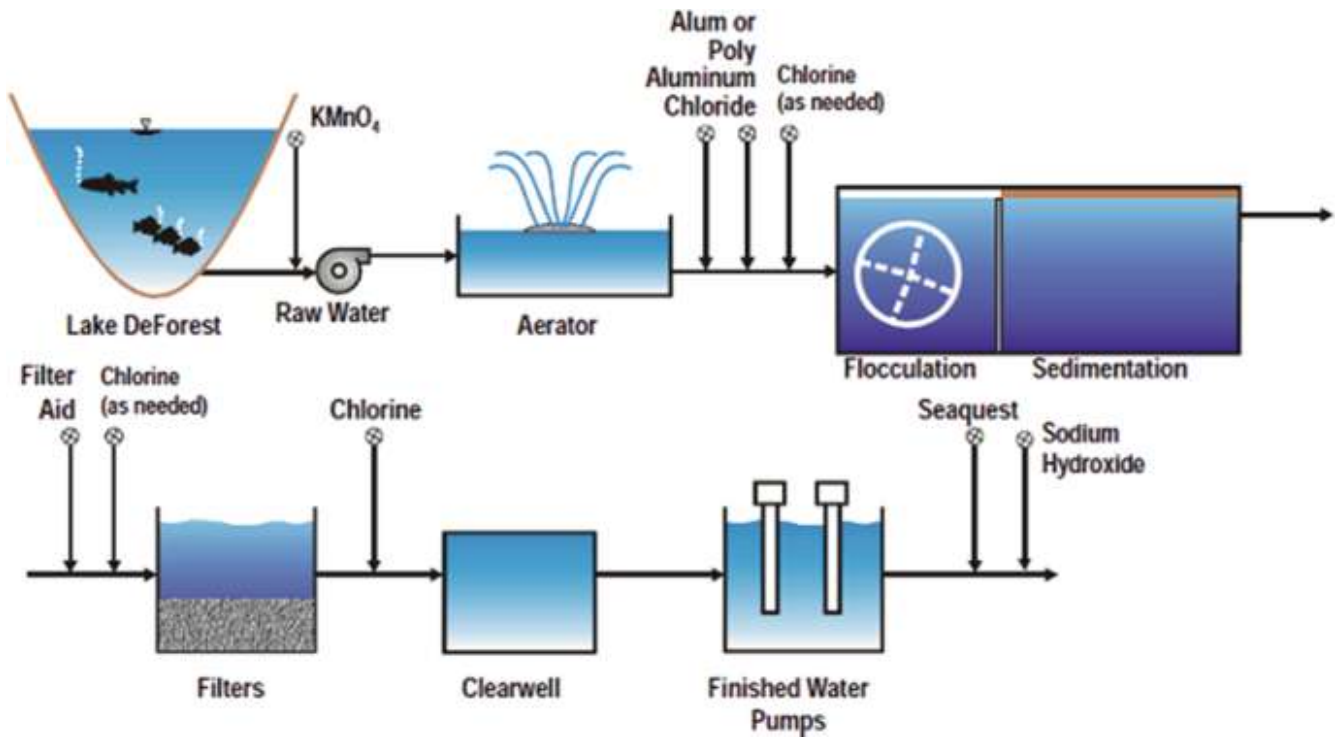

Before the water is distributed into the public houses, the water has to undergo the water treatment process such as follows: -

- Aeration is to eliminate unneeded dissolved gases such as (CO_2 , H_2S , NH_3).
- Coagulation is the removal of turbidity from the water.
- Turbidity is a cloudy appearance of water caused by small particles suspended therein. Water with little or no turbidity will clear.
- Flocculation is mixing process in which particles are brought into contact in order to promote their agglomeration
- Sedimentation is to remove suspended material from water by the action of gravity.
- Filtration is to remove suspended particles from water by passing the water through medium such as sand.
- Disinfection is to destroy pathogens within a practicable period of time.

- Water distribution is to satisfy the water requirements for a combination of domestic, commercial, industrial, and fire-fighting purposes.

After water passes or flowing through all distinctive features, it is collected into watertank and ready to be supply to houses area.

Fig.Flowchart of water treatment plant

1). OBJECTIVE

The objectives of visiting the water treatment plant are: -

- To study the types of water treatment plant used.
- To study the process of water treatment.

2). WATER TREATMENT PROCESS

A). COLLECTION:-

The raw water which is supplied to the water treatment plant comes from periyar river.

FIG. Water is made to fall in the form of thin sheet, over a series of steps. During the fall, water mixes thoroughly with atmospheric air and get aerated, absorb oxygen for the reduction of taste, odor etc.

B) SEDIMENTATION PLAN/SEDIMENTATION COAGULATION:-

The raw water is first treated with chemical coagulant alum. The dose of alum varies depending upon the turbidity, color, temperature & pH of the water.

C) DISSOLED AIR FLOTATION {DAF}:-

It is a water treatment process that clarifies wastewaters by the removal of suspended matter such as oil or solid. The removal is achieved by dissolving air in the water under pressure and then releasing air at atmospheric pressure in the flotation tank basin.

D) FLASH MIXING AND FORMATION OF SLUDGE:-

Treated water is then subjected to violent agitation in a mixing chamber for a few minutes. This allows quick and rapid dissemination of alum throughout the bulk of the water.

E) FILTRATION:-

- -Each filter unit has 6 sand beds – coarse pebble, fine pebble, coarse gravel, fine gravel, coarse sand, fine sand.
- -The thickness of sand bed is 110 cm.
- -The under drains at the bottom of the filter bed collect the filter water.

F) BACKWASHING:-

- As filter proceeds, the suspended impurities and bacteria clog the filters.
- The filter soon becomes dirty and begin to lose their efficiency and are subjected to backwashing.
- This is done by reversing the flow of water through the sand bed.
- Washing is stopped when clear sand is visible and the wash water is sufficiently clean.
- It takes about 15 minutes.

G) DISINFECTION :-

- This is the last step before storage and distribution of this water.
- The process used is chlorination.
- The chlorine gas is used for effective disinfection

CONCLUSION

Water plays a very important role in human life, whether for daily routine purpose or human health. This field visit gave us the knowledge about the purification of water on large scale and made us aware about the quality of water since it may affect the human health especially. Also the trip made us realized that it is not easy to supply the water directly from the main supply to the people.

Women's Grievance and Redressal Committee in association with Whisper India

Remarks:

The program was conducted on 14th June 2024 by Ms Shilpa Narayan who interacted with the young women of our institute about personal hygiene and personality development. Ms. Narayan delivered an impactful lecture on Personal and Professional development. She in her lecture mentioned about prioritizing communication skills, educational goals and to develop a forward-thinking mindset in students and motivated them in improving their presentation skills. She also provided information on how to interact and overcome various professional hurdles. The session ended by providing free menstrual and personal hygiene samples to all the women. Overall, the program was an interactive, informative and helped students to bring in positive changes in their lifestyle.

Remarks:

The International Women's Day was celebrated at KLE Institute of Dental Sciences on 12th march, 2024 with utmost zeal and enthusiasm embracing the spirit of Femininity, Grace, and womanhood and encouraging women and empowering women.

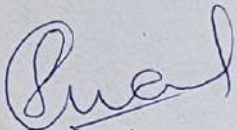

The theme for the event was **INSPIRE – INCLUSION**.

The day commenced with holy lamp lighting ceremony followed by invocation song by Dr. Sanskriti to begin the event with a pure and soulful mind.

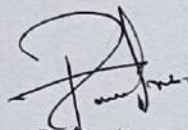

The event was set in motion by awe- inspiring lectures by Principal -Dr. Srivatsa. G, illuminating speech by Dr. Supriya Manvi, and mind boggling guest lecture by **Mr. Mahesh** [Team India Entrepreneurship Trust], on Cyber Security, to create awareness on the cryptic topic and to enlighten and arm us with knowledge to face battles on the digital front followed by Educational Talk on '**ORAL HEALTH AND WOMEN'S HEALTH**' BY Dr. Divya Jyothi followed by a touching vote of thanks by Dr. Disha V. Murthy.

The students organized a plethora of splendid cultural events with graceful and majestic dances organized by different batches of undergraduate students and Interns and delightful performances of postgraduate students and enthralling performances by staff coupled with fascinating and captivating songs of joy. The beautiful performances from all across the batches sprinkled an air of joy and happiness to the delightful day.

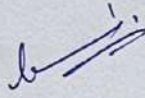

The event was a staggering success in celebrating the enchanting and magnificent spirit of Womanhood.

The *National Service Scheme* unit, in association with the *Department of Public Health Dentistry* of KLE Society's Institute of Dental Sciences, Bangalore celebrated 'INTERNATIONAL YOGA DAY 2024' on 21st June 2024.

Yoga is an ancient physical, mental and spiritual practice that originated in India. Recognizing its universal appeal, on 11 December 2014, the United Nations proclaimed 21 June as the International Day of Yoga, aiming to raise awareness worldwide of the many benefits of practicing yoga. This year marks the 10th International Day of Yoga with the theme "Yoga for Self and Society."

On the occasion of International Yoga Day 2024, various activities were organized, within the campus, to promote yoga among all age groups.

The following events were conducted,

- Offstage event – Yoga Asana competition
- Yoga awareness talk by Ms. Gauravi Shankar
- Yoga session at Main auditorium by Ms. Gauravi Shankar

Offstage event – Yoga Asana Competition

An Offstage yoga pose contest was conducted, wherein the participants were asked to send a photograph performing a yoga pose. Numerous entries were received, and the candidates were judged by Ms. Gauravi Shankar, yoga practitioner & instructor and winners were announced & awarded with certificates. The winners of the contest are as follows:

1st place - Dr. Ganavi, Intern

2nd place – Dr. Sushmitha, 2nd year PG

3rd place – Dr. Binith, 3rd year PG

Yoga awareness talk by Ms. Gauravi Shankar

A public awareness talk was given by Ms. Gauravi Shankar, experienced yoga practitioner & instructor, regarding the benefits of yoga and how can one incorporate yoga into daily routine in order to achieve a holistic approach towards health promotion.

This event was conducted at the main auditorium of KLE dental college, Bangalore and was attended by all undergraduate and post-graduate students, teaching and non-teaching staffs of the institute. The talk proved to be beneficial all the students and faculty who attended it, and enhanced awareness and motivation towards yoga practice.

Yoga session at Main auditorium by Ms. Gauravi Shankar

A Brief yoga session was conducted by Ms. Gauravi Shankar, for the students and staff at Main auditorium, KLE dental college. Basic yoga poses, targeting back and shoulders were demonstrated followed by short relaxing meditation.

Overall, the Program was a huge success and everyone enjoyed being a part of it.

National Reading Day

Date: 19/06/2024

The 25th National Reading Day is celebrated on 19th June every year in India to honour Puthuvayil Narayana Panicker, popularly known as P. N Panicker. He was a renowned teacher and revered as the founding father of the literacy movement & libraries in Kerala.
