REMARKS :

The ceremony commenced with the traditional presentation of white coats to the students. This act, performed by esteemed faculty members, symbolizes the students' entry into the clinical phase of their medical education. It signifies their commitment to the values and responsibilities of the medical profession.

The students collectively recited the Hippocratic Oath, pledging to uphold the highest ethical standards in their practice. This ancient oath, led by Dr. Madhu K, instills a sense of duty, integrity, and dedication to patient care, which are foundational principles in the medical field.

Following the ceremonial aspects, the students attended a series of lectures designed to equip them with essential knowledge and skills for their clinical practice. The topics covered were pivotal for their clinical practice and personal development as future doctors.

Dr. Parvati delivered an insightful lecture on sterilization and disinfection. The lecture covered the principles and techniques used to maintain a sterile environment in clinical settings, crucial for preventing infections and ensuring patient safety.

Effective communication is a cornerstone of patient care. Dr. Haripriyanka conducted an interactive session on patient communication skills, emphasizing the importance of empathy, active listening, and clear dialogue in building trust and improving patient outcomes.

The students were introduced to basic principles of clinical management by Dr. Prathima. This lecture provided an overview of patient assessment, diagnostic reasoning, treatment planning, and interdisciplinary collaboration essential for delivering comprehensive care.

In light of recent global health challenges, Dr. Madhumitha discussed personal protection measures. This lecture highlighted the use of personal protective equipment (PPE), hand hygiene, and protocols to protect both healthcare workers and patients from infectious diseases.

To foster a culture of inquiry and innovation, Dr. Harshitha spoke on the scope of research in medicine. Students were encouraged to engage in research activities, explore scientific questions, and contribute to advancements in medical knowledge and practice.

The students acknowledged the significance of the white coat and the oaths taken, recognizing the responsibilities and ethical obligations they now shoulder. Faculty members expressed their pride in welcoming the new class and confidence in their potential.
